

# STRUB Stabillo Cut FRT AI-ES

Semi-synthetic cooling lubricant

Art.-No. 33128

# Description

Industry 4.0 is on everyone's lips and digitalization is in full swing. This calls for a digital lubricant, with future-oriented function as a design element. The new series of Strub Stabillo Cut is based on Future Resistant Technology (FRT). The novel technology characterizes this latest generation water-miscible cutting lubricant for tremendous performance. STRUB Stabillo Cut FRT Al-ES proves to have above-average stability and guarantees optimum cooling and lubricating effect due to its excellent wettability. Low-foaming behavior, excellent corrosion protection for workpiece, tool and machine round off the excellent properties of STRUB Stabillo Cut FRT Al-ES.

# **Application**

Specially recommended for light to heavy machining and grinding operations. The product is suitable for machining aluminum, copper as well as cast iron, steel and their alloys.

# Features and advantages

- universal application
- · long tool life and good surface quality
- sustainably resistant
- high emulsion stability
- low foaming
- excellent corrosion protection
- low consumption and good wash-off behavior
- good skin compatibility
- exceptional demulsifying behavior
- no residues and sticking
- · free of formaldehyde and chlorine

### Mixing ratio

Concentration	Refractometer reading	Effective concentration
Grinding	Min. 4.0 %	Min. 4.0 %
Turning	5.0 % - 7.0 %	5.0 % - 7.0 %
Drilling / Milling	6.0 % - 9.0 %	6.0 % - 9.0 %
Reaming	7.0 % - 9.0 %	7.0 % - 9.0 %
Thread cutting	8.0 % - 10.0 %	8.0 % - 10.0%
Sawing	9.0 % - 10.0 %	9.0 % - 10.0 %
Deep hole drilling	9.0 % - 10.0 %	9.0 % - 10.0 %

The information in this technical data sheet is based on general knowledge and application possibilities. STRUB + Co. AG is not liable for damage resulting from improper use of the products. The industry-standard measurement and production tolerances apply to the specified characteristic. Generally, no legal binding can be derived from these data. Our products are subject to continuous further development. Therefore, STRUB + Co. AG reserves the right to change all technical data in this data sheet at any time and without prior notice.

Density at 20°C

Viscosity at 20 °C

Viscosity at 40 °C

Mineral oil content

**Emulsion** 

Appearance 5% in tap water

pH value 5% in tap water

Corrosion test DIN 51360-T2 - 5% in tap water

Suitable hardness of the preparation water

Factor Refractometer reading

Do not store below 7 °C or above 40 °C

Do not expose the container to direct sunlight.

If the cooling lubricant has nevertheless been exposed to temperatures below 7 °C or even in the freezing point range for a short time, the container should be stored at room temperature for 3 days and then the concentrate must be

stirred vigorously until it is clear or homogeneous.

brownish 0.979 g/cm³ ~ 130 mm²/s ~ 48.3 mm²/s 40%
