

# **STRUB Water Resistant Grease 1907**

Absolutely water-resistant universal grease

### Art.-No. 31145

## Description

STRUB Water Resistant Grease 1907 is a modern high-tech formulated universal lubricant. It is absolutely water resistant and not emulsifiable in water.

#### Application

STRUB Water Resistant Grease 1907 is an excellent anti-seize grease for ball bearings. The exceptional vibration and adhesion properties of STRUB Water Resistant Grease 1907 prevent squeaking or chattering on bolts and joints. STRUB Water Resistant Grease 1907 is used wherever snow vehicles come into contact with water and salt. Also suitable for ships in fresh and salt water, chain drives in watery and humid environments, conveyor belt rollers for wet roads and many more. The product extends the service life of bearings or workpieces by several times compared to conventional universal greases. Thanks to the excellent film thickness of STRUB Water Resistant Grease 1907, relubrication intervals are thus not only considerably extended, but also the formation of rust in humid environments is suppressed in the long term.

#### **Technical data**

Color	cream
NLGI class	2
Drip point	250°C
Penetration	284
Four-ball apparatus	315 kg
Oxidation according to Norma Hoffmann after 100 hrs.	< 10 PSL
Anti-corrosion test Emcor	1 - 2
Operating temperature range	- 20 to + 150°C
Quality level	NSF H1 / HALAL

#### Transport

ADR/SDR

No dangerous goods

#### Entsorgung

LVA VeVA / EAK: 12 01 12

The information in this technical data sheet is based on general knowledge and application possibilities. STRUB + Co. AG is not liable for damage resulting from improper use of the products. The industry-standard measurement and production tolerances apply to the specified characteristic. Generally, no legal binding can be derived from these data. Our products are subject to continuous further development. Therefore, STRUB + Co. AG reserves the right to change all technical data in this data sheet at any time and without prior notice.
