## STRUB Vulcoway 32+ - 320+

Highly demulsifying slideway oil as well as oil for central lubrication systems

## Description

Special demulsifying slideway oils and oils for central lubrication of the highest quality.

## Application

Suitable for machine tools with horizontal or vertical slides, where mixing of slideway oil and water-mixed coolant cannot be avoided, as well as for central lubrication systems.

## Features and advantages

- extremely low coefficient of friction according to Schmidt, resulting in lower heating of the slideways, this allows high speeds, drive power is lower
- no stick-slip, a must for metallic pairings
- no attack on plastic coated slideways (epoxy)
- excellent demulsibility and good compatibility with water-miscible coolants, SKC rating. (Documents are available)
- very good oxidation stability, highly effective corrosion protection
- balanced EP properties and wear protection
- good adhesion, also to vertical guides
- very good sliding behavior with various material combinations
- compatible with all mineral oil resistant sealing materials, non-ferrous metals and paints
- extremely precise guidance of the machine is made possible
- more odorless than most multifunctional oils

## Specifications

Slideway oil type CGLP, DIN 51502
Hydraulic oil type HLP, DIN 51524 part 2 and Afnor
Industrial gear oil type CLP DIN 51517 part 3
Cincinnati Machine P-47 (ISO 68)
Cincinnati Machine P-50 (ISO 220)
Cincinnati Machine P-53 (ISO 32)
Approvals from the most important machine manufacturers
